

Tarun SINGH

Software Engineer | Full-Stack Development, Cloud & DevOps

Tarunsingh1271@gmail.com | +33 7 45 69 21 71 | Paris, France | [Tarun SINGH LinkedIn](#)

EXECUTIVE SUMMARY

DevOps-focused Software Engineer with **3+ years of experience** across cloud infrastructure, CI/CD, Kubernetes-based platforms, backend services, APIs, internal tools, and web applications. Strong in **AWS, Docker, Kubernetes, Terraform, GitLab CI/CD, GitHub Actions, CloudWatch, monitoring, logging, Node.js, TypeScript, React, and PostgreSQL**, with a track record of improving release reliability, strengthening production operations, automating workflows, and supporting scalable cloud-native systems. Experienced collaborating across **engineering, QA, product, design, data, and operations**, with growing focus on **DevOps, platform engineering, observability, and AI-assisted automation**.

SKILLS

Programming Languages

JavaScript, TypeScript, Java, C, C++, Python, Bash

Frameworks, Libraries & Application Development

Node.js, React, GraphQL, REST APIs, backend services, web applications, internal tools, responsive UI development

Cloud, Delivery & Observability

AWS, Docker, Kubernetes (EKS), Terraform, GitLab CI/CD, GitHub Actions, CloudWatch, observability, monitoring, logging, production reliability

Product, Collaboration & Automation

Agile/Scrum, product thinking, stakeholder collaboration, problem discovery, onboarding flows, monetization, product discovery, Python, Bash, AI-assisted development, automation workflows, Git, Jira

EDUCATION

ESILV — École Supérieure d'Ingénieurs

Léonard de Vinci, Master in Cybersecurity & Cloud Computing

2022 – 2024 | Paris, France

Chandigarh University, Bachelor of Computer Applications (BCA)

2018 – 2021 | Punjab, India

LANGUAGES

English — Fluent

French — Professional

WORK EXPERIENCE

Cloud and DevOps Engineer, RGIS

12/2024 – Present | Paris, France

- **Internal Tools & Operational Efficiency:** Built and supported cloud-backed environments that enabled faster delivery of internal and customer-facing applications, reducing friction for teams shipping product and operational workflows.
- **Reliable Systems:** Managed Kubernetes-based services with Helm and autoscaling, improving resilience for production workloads and strengthening day-to-day operational reliability.
- **Reliable Software Delivery:** Improved CI/CD workflows and release safeguards with GitLab CI/CD, automated checks, and environment standardization to help teams ship reliable software and learn safely from production.
- **Secure Application Foundations:** Implemented authentication and authorization patterns including JWT, OAuth, RBAC, and least-privilege access controls across cloud-native services.

Devops Engineer Intern, Qubit Pharmaceuticals

04/2024 – 09/2024 | Paris, France

- **Engineering Quality:** Built and maintained GitLab CI/CD pipelines on AWS, contributing to 98% test coverage and reducing post-deployment regressions by 30%.
- **Internal Tools, Data & Observability:** Delivered internal dashboards on AWS and centralized logs with Elasticsearch and CloudWatch, exposing useful operational data and improving decision-making for internal users.
- **Backend Performance:** Improved legacy Ruby on Rails APIs, reducing response times by 25% through targeted query optimization and asynchronous processing.
- **Workflow Automation:** Shipped backend services and React dashboard enhancements used daily by scientific teams, reducing manual effort by 30% through API-driven automation and better internal workflows.

Software Engineering Intern, Fluvid Technologies

03/2023 – 08/2023 | India

- **Backend Services & APIs:** Built and maintained REST APIs serving 10,000+ active mobile and web users, supporting production workloads while sustaining p95 latency below 200 ms.
- **Data & Performance Optimization:** Optimized PostgreSQL schemas and indexed high-cost queries, reducing execution time by 40% and improving throughput under load.
- **Application Security:** Implemented JWT, OAuth 2.0, and RBAC controls to strengthen application-wide authentication and access management across web services.

Frontend Developers, Brain Mentors Pvt Ltd.

01/2022 – 08/2022 | India

- **User Engagement:** Accomplished a 20% increase in user engagement on web applications by using Java and JavaScript frameworks to develop and implement innovative UI designs.
- **Cross-Functional Debugging:** Collaborated with cross-functional teams to resolve coding issues, resulting in 30% fewer bug reports from users.
- **Team Collaboration:** Worked closely with developers, QA engineers, designers, and product teams in a result-oriented environment.
